Wiring Regulations based on the Electrical Code of the City of New York
All Electrical apparatus and splices must be installed in a metal enclosure to prevent emission of sparks.
All metal raceways, metal lighting fixtures, metal housings of electrically powered equipment shall be grounded.
All extension cables shall be 3-wire SJ cord or other Approved type and not more than 10ft long. One of the wires with green colored insulation is to be used as ground. The cable must be large enough for the load and have a grounded male plug. Flexible cords and cables less than #14 gauge wire shall not be permitted.
Plug in strips shall be mounted no less than 2ft 6in above the floor and shall be securely fastened. Labor is not included for special power requirements. Labor will be charged at prevailing rates on a half-hour basis.
NY Marriott will not be responsible for any voltage fluctuations or power failures beyond our control.
